Jewelry Polishing Cloth

Gently remove tarnish and dirt from your silver, gold and platinum jewelry by polishing with the white inner cloth. Finish by buffing to a high luster with the outer cloth, restoring the patina to your treasured pieces.

Caution: No chemically treated cloth, including this jewelry polishing cloth may be used on the following items: amber, coral, emerald, ivory, jadeite, lapis, lazuli, malachite, opal, pearls, turquoise or 24 karat gold (we use 14 karat which is fine with this cloth).

With proper care, fine quality silver will last a lifetime. To minimize scratches and tarnishing (a dulling that naturally occurs when silver reacts with sulfur or hydrogen sulfide in the ambient air), store silver jewelry in a Ziploc bag. Avoid exposing your silver to household chemicals when cleaning with bleach or ammonia, or when swimming in chlorinated water, as these chemicals can damage silver.

Care should also be taken to prevent silver tarnish build-up. To clean your silver, use polishes formulated specifically to remove tarnish. You can find fine silver polishes, solutions, or cloths appropriate to remove tarnish at most hardware stores or specialty craft stores. Tarnish is most easily removed when it first becomes visible.

Price: \$3.50
